

Lynx[®]

Experience streamlined efficiencies in inventory management, purchasing, and charge capture

Lynx is a customizable, web-based specialty medication inventory management system designed to help specialty practices overcome the challenges associated with delivering injectable and infusible medication therapy. As the leading inventory management solution for outpatient practices, Lynx helps more than 3,100 physicians in 1,100 practice locations deliver infusion and injection therapy for patients with complex diseases.

Streamline your data

100% web-based system allows staff at multiple site locations to access simultaneously and integrates directly with your practice management, EHR, and ordering systems.

Intuitive reporting

Identify revenue and cash flow opportunities, view usage trends, track inventory turnover, and quickly perform audits to identify discrepancies between dispensing and billing.

Lean inventory

Drug data is automatically captured with barcode scanning allowing you to track all drug purchases, dispensing activities, total value of drugs, and view lot numbers.

Charge capture

Capture every billable charge accurately and connect directly with your billing application to submit complete charges.
